

# SOLUTION ARCHITECT

Pragmatic & creative technical leader

“ I’m a senior IT professional, experienced in delivering large international projects as technical lead. In this role, I get to work with customers to improve core components of the enterprise IT infrastructure or processes (eg. user lifecycle management) in order to ensure successful deployment of security solutions .

## // RECENT PROJECTS

### Web Access Management @ Colruyt

jan 2019 – current

Design and production deployment of IBM Verify Access (virtual appliances) using Ansible, Git, Hashicorp vagrant .

The Access Management solution' focus is on supplying an Identity provider for all OAuth based web services and to provide single sign on for legacy internal applications (PeopleSoft , WebSphere Portal)

### Web Access Management POC @ Colruyt

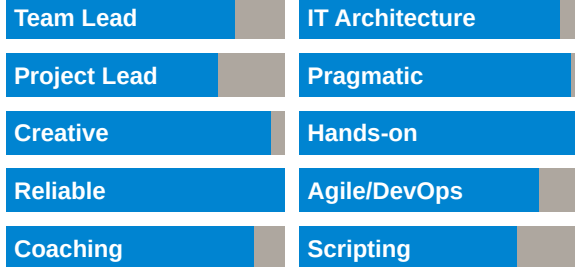

sep 2018 – nov 2018

Performing an extensive Proof of Concept with IBM Security Access Manager v9 to replace an existing Access Management solution. The goal was to use open standards for authentication and federation (OIDC and OAuth)

We built a solution using ISAM, to validate the use cases of the customer . This resulted in Colruyt signing a large software deal with IBM.

### Web Access Management @ Belastingdienst

march 2019 – march 2020

Belastingdienst

Design and production deployment of ISAM at Belastingdienst, with physical appliances. The focus is to create a solution to allow all Dutch tax payers access to their personal tax portal.

Use of Ansible, Ansible Tower, Jenkins, Git.

### Web Access Management POC @ Belastingdienst

may 2018 – jun 2018

Belastingdienst

Performing a Proof of Concept with IBM Security Access Manager v9 to resolve a years-old problem at the Belastingdienst (NL) as part of a team consisting of 2 people.

We built a solution using ISAM, to handle all different types of LTPA tokens in use and integrated with the different directories (AD, Domino, custom).
